SUMMARY

Self taught full stack web developer specializing in frontend and backend, eager to contribute to the real world projects.

TECHNICAL SKILLS:

Engineering Executive , Borcelle Technologies

- Frontend: React JS with React Router 7, Tailwind CSS, Javascript
 - Backend: Node JS, Express JS, React Router 7, Javascript
 - Database: Postgres SQL
-

PROJECTS:

Plotwist | React, React Router, TMDB API

- Designed and developed The Movie Database(TMDB) web app that allows users to explore and search movies with real-time data from TMDB.
- Implemented responsive UI with dark mode and API integration for fetching and displaying movie details. [Github](#) | [Live Demo](#)

FoodFetish | React, Node.js, PostgreSQL, Spoonacular API

- Developed a full-stack recipe finder app with user authentication, session management, and favorite storage in a PostgreSQL database. Integrated Spoonacular API using Axios and secured credentials with dotenv and bcrypt. [Github](#)

Taskify | React

- Developed a simple yet dynamic task management app using React. Implemented CRUD functionality with intuitive UI and local state handling for a smooth user experience.
